Solar Panels

All homes in our development come equipped with solar panels as a standard feature. Embracing renewable energy, we aim to reduce our carbon footprint while empowering homeowners to harness the power of the sun for their energy needs. With solar panels adorning all roofs, residents can enjoy not only the benefits of clean energy but also significant savings on their utility bills.

Images and site layout are intended for illustrative purposes only and should be treated as general guidance only. Site layout including parking arrangements (social/affordable housing, community buildings, play areas and public open spaces) may change to reflect changes in planning permission for the development. Please speak to your solicitor to whom full details of any planning consents including layout plans will be available.
